Summary

I'm a results-driven marketing and community professional with experience in developer relations, content marketing, community engagement, and brand growth at MindsDB. Skilled in community coordination, cross-platform campaign management, content strategy, and digital communications, with a proven ability to grow and support developer ecosystems while strengthening brand visibility and audience engagement. Experienced in collaborating with product, engineering, and marketing teams to deliver impactful campaigns, technical content, community initiatives, and events.

Passionate about technology, open-source communities, content creation, and strategic communication, bringing a creative, proactive, and collaborative approach to projects and team environments. Following a company-wide restructuring at MindsDB, my role was impacted as part of broader organizational changes, and I transitioned from the company on positive and professional terms.

My personal goal is to grow my own personal social media presence as I have only been focused on the company's, and grow my career further by taking courses in Product Marketing. If I'm not spending time with my family and pets, I enjoy playing chess and video games, writing poetry try to live life to the fullest.

Work experience

MindsDB	March 2024 - May 2026
Marketing & Community Coordinator	
As a Marketing & Community Coordinator at MindsDB working remotely, I was responsible for managing community engagement, coordinating content distribution across multiple platforms, and tracking performance metrics to improve community growth and product visibility. The role combined community management, content marketing, event coordination, social media communications, and data analysis while working closely with product,	

Engen Petroleum	
- Sales Documents - Plant Maintenance - Customer Inquiries(Internal + External); - Consumer Complaints & Inquiries. - Master Data Management: Users, Accounts, Account information,	
Vodacom	
- Credit Vetting information - Service requests - Contact Information - Installation address - Delivery address - Billing Account Information	

Client Support Skills

1st Line - End User Support	8
Assisting end users via telephone and email	
Tasks include:	
- User Account Password resets - Creation New User accounts - Issue Trouble Shooting - Login / Authentication. - Navigation - Browser - Network - Analyzing and diagnosing other issues and escalating the matter to the relevant parties.	

Skills

Vodacom management systems	7
- Siebel - Morpheus - MSPI - ICAP - VPP - Axcess - Cisco

engineering, and sales teams. I reported directly to the CMO, and worked closely with the Marketing Manager and Marketing Designer to drive our initiatives. Besides my responsibilities, I connected with our community and made sure to cultivate an incredible online culture with both the community and internal teams. I love people, content creation, and I love AI & technology, so this is a passion that comes naturally to me.

Key Responsibilities & Achievements

Here is a list of the content I created and webinars I hosted:

- [Use cases and Product Update blogs](#)
- [MindsDB In Practice - Live Q&A Webinars](#)
- MindsDB Webinars:
 - [How to Unlock AI Search on Private Data Stores\(MindsDB x Nvidia\)](#)
 - [Building Multi-Agent AI Systems for Enterprise Data with Google's A2A Protocol \(MindsDB x Google\)](#)
 - Webinars with Andriy Burkov
 - [Fast-Track Knowledge Bases: How to Build Semantic AI Search](#) (The video editor removed the intro and Q&A part, however you can see this in the next list of videos).
 - [How to Blend Hybrid Retrieval with Structured Data](#)
 - [Ask Your Data Anything — Enterprise AI Analytics with Minds](#)
 - [Unlocking Real-Time Data Access for In-house AI](#)
 - [AI Knowledge Bases at Scale: Discovering Key Analytics Insights in Massive Data Archives](#)
 - [Inside MindsDB Anton - Autonomous Business Intelligence Agent](#)

Content Marketing & Distribution

- Created and wrote technical blog content focused on product use cases, tutorials, integrations, and community education.
- Wrote and managed Product Update blogs to communicate feature releases and platform improvements as well as Launch blogs for new features or products.
- Curated and managed content for the MindsDB newsletter to ensure a consistent publishing pipeline.
- Collaborated with Product, Engineering, and Sales teams to co-author technical and use-case-driven content.
- Used CMS platforms such as Framer to publish website content and HubSpot to schedule and manage social media distribution.
- Cross-published content across platforms including Medium, Dev.to, Hashnode, Hackernoon, and DZone.
- Monitored article comments, questions, and community engagement across publishing platforms.
- Conducted content audits to identify outdated content and coordinate updates or removals.
- Supported promotional campaigns through SEO optimization, cross-linking strategies, UTM tagging, and content distribution best practices.
- Created memes, social media graphics, video snippets, and promotional content for community engagement.
- Created dedicated product pages for the MindsDB website, including integration pages for [HubSpot](#) and [Salesforce](#).
- Produced screen-recording product demonstrations and website snippets(you can see this on MindsDB's product pages [MindsDB Anton](#), [Query Engine](#), and [Minds Enterprise](#)) using Cursor and iMove and Adobe.
- Driving brand awareness through social campaigns, even without paid promotions.

KPI Tracking & Data Analysis

- Monitored and reported on community engagement metrics across Slack, GitHub, Stack Overflow, newsletters, and social media platforms.
- Tracked and analyzed content performance metrics across all publishing and distribution platforms.

Virtual Machines 6

Basic understanding of Virtual Machines & Containers:

- Docker
- VirtualBox

Web Technologies 4

- HTML
- Swagger
- Markdown language
- CSS
- JavaScript
- Vue.JS
- WordPress
- ArcGIS Online & ArcGIS Pro
 - ArcMaps
 - ArcGIS Business Enterprise
 - ArcGIS Living Atlas

Microsoft Suite (Office & BI) 8

- Power Bi
- Excel
- Outlook
- PowerPoint
- Word
- Forms
- OneDrive
- Sharepoint

SAP 7

- ERP
 - Sales and Distribution
 - Plant Maintenance
 - Material Management
- BI / BW
- CRM
- QAS

- Captured and maintained monthly analytics reports for blog performance, engagement, and social media growth.
- Used performance insights and engagement data to guide future content strategy and community initiatives.
- Identified trends and relevant social media topics to improve product visibility and audience

Hackathons, Events & Community Engagement

- Led and managed Hacktoberfest initiatives at MindsDB as Project Lead:
 - Designed the Hacktoberfest competition structure, contribution rules, prize systems, and contributor engagement strategy.
 - Identified contribution ideas and supported contributors throughout the event lifecycle.
 - Managed contributor communication, bug support, project coordination, contribution reviews, and post-event administration.
 - Coordinated prize fulfillment and contributor rewards while ensuring all qualifying contributions were reviewed by internal teams and myself.
 - Designed Hacktoberfest SWAG T-shirts and contributor merchandise.
- Collaborated with Quira to organize hackathons where contributors solved Quests related to MindsDB.
- Organized and hosted monthly community webinars in collaboration with the Product team.
- Conceptualized and designed the ["MindsDB In Practice" webinar series](#). The last few webinars we switched over from zoom calls to doing Live streams across platforms like Youtube, Twitter and LinkedIn.
- Hosted webinars and collaborative sessions featuring teams from NVIDIA, Google, and webinar sessions with Andriy Burkov, Ph.D and best selling author.

Community & Social Communications Coordination

- Managed and moderated online communities across Slack, GitHub, GitHub Discussions, HubSpot Live Chat, and Stack Overflow.
- Responded to user questions in the Slack community and managed community interactions through Clearfeed.
- Pro-actively engaged with community members:
 - Finding out what their use cases are and how we can solve it with AI
 - Collaborating with Open Source community members by assisting them in participating in the Contributor programme to improve their own developer portfolio.
- Worked closely with Product and Engineering teams to troubleshoot bugs, communicate updates, and manage user expectations effectively.
- Assisted contributors in contributing to the open-source MindsDB project.
- Managed GitHub issues and bug reports by triaging, assigning issues to contributors or internal staff, and ensuring follow-through.
- Served as the first line of communication across Twitter, LinkedIn, Facebook, and YouTube by managing inboxes, responding to community questions, and escalating inquiries where necessary.
- Maintained consistent company messaging across all product review platforms.
- Lead a project where I got MindsDB to be listed on companies' documentation , github repository or website who the MindsDB product was integrated with.
- Managed the company SWAG store through Covver, including distributing swag credits, reviewing contributor eligibility, and designing swag items for the store.
- Managed and responded to questions posted by customers via the MindsDB Chat Interface on the Enterprise Minds Product via Slack and Hubspot.

QA, Product Support & Cross-Functional Collaboration

- Performed QA testing for newly released product features before and after launch.
- Logged and tracked bug reports, and worked with the product and engineering team to have them solved via Linear.
- Integrated QA directly into the content creation process by testing workflows and product functionality while developing tutorials and documentation.
- Collaborated closely with Product and Engineering teams to provide user feedback and improve the contributor and user experience.

Soft Skills

Personal

- Adaptability
- Proactive Problem Solving
- Creative Thinking
- Results-Driven
- Self-Motivated
- Strong Organizational Skills
- Continuous Learning Mindset
- Resilient Under Pressure
- Strategic Thinking
- Attention to Detail

Professional

- Cross-Functional Collaboration
- Community Engagement
- Project Coordination
- Content Strategy & Communication
- Analytical Thinking
- Public Speaking & Presentation Skills
- Stakeholder Management
- Time Management
- Initiative & Ownership
- Brand & Community Advocacy

Interpersonal

- Team Collaboration
- Leadership
- Empathy & Active Listening
- Transparent Communication
- Relationship Building
- Conflict Resolution
- Constructive Feedback Acceptance
- Community-Focused Mindset
- Interpersonal Communication
- Positive & Professional Attitude

MindsDB

November 2023 - March 2024

Community and Social Co-ordinator

Over the course of one year as a Community & Social Coordinator at MindsDB, I played a key role in growing and supporting the company's open-source community through community management, contributor support, social media engagement, content publication, event coordination, and cross-functional collaboration with product and engineering teams. I acted as a bridge between users, contributors, and internal teams, helping improve the overall community experience while driving engagement and adoption of the product.

- Managed and moderated online communities across Slack and GitHub, serving as the primary point of contact for users, contributors, and community members.
- Responded to technical and product-related questions within the Slack community and managed community interactions through Clearfeed. I also started 'coffee chats' with community members to get to know them better.
- Collaborated closely with Product and Engineering teams to troubleshoot bugs, communicate updates, and manage user expectations effectively.
- Assisted contributors with onboarding and contributing to the open-source MindsDB project.
- Managed GitHub issues and bug reports, including triaging, assigning tasks to internal staff or contributors, and ensuring timely follow-up.
- Coordinated project management activities for community hackathons and contributor programs.
- Played a key role in managing Hacktoberfest initiatives at MindsDB, including:
 - Identifying and organizing suitable contribution ideas and beginner-friendly issues
 - Supporting contributors throughout the event lifecycle
 - Managing communication around bugs and contribution challenges
 - Reviewing contributions alongside the internal team post-event
 - Handling administrative coordination for prizes, winner selection, and swag distribution
- Organized and hosted monthly community webinar.
- Managed cross-platform publishing of blog content, product announcements, and event promotions across social media channels. I published content via Social Sprout and directly on Facebook, LinkedIn, Twitter, Medium, Hashnode, Dev.to, Dzone, Hackernoon and Hackernews.
- Served as the first line of communication on Twitter, LinkedIn, and Facebook, managing inboxes, responding to community questions, and maintaining positive user engagement.
- Led initiatives to maintain consistent company messaging and reputation management across review and listing platforms.
- Coordinated partnerships and visibility efforts by getting MindsDB featured in third-party documentation and integration partner websites.
- Performed QA testing on newly released product features before and after launch, working closely with engineering teams through GitHub project boards.
- Researched and identified relevant social media trends and topics to increase community engagement and product visibility.
- Managed the company SWAG program through Covver, including distributing swag credits, reviewing contributor eligibility, and rewarding community participation.

MindsDB

March 2022 - November 2023

Community Maintainer

I first started at MindsDB as a Community Maintainer, where I focused on supporting and growing the open-source community while helping improve contributor engagement and project collaboration.

Key Responsibilities & Achievements

- Managed and moderated online communities across Slack and GitHub.
- Responded to community questions, technical issues, and contributor support requests within Slack channels.
- Managed community interactions and support workflows using ClearFeed.
- Assisted open-source contributors with contributing to the MindsDB project, including onboarding and guidance through contribution processes.

- Managed bug reports and GitHub issues, including assigning tickets to contributors or internal staff members.
- Supported project management and coordination for community Hackathons.
- Assisted in organizing and managing MindsDB's participation in Hacktoberfest.
- Created technical blog content on DEV Community focused on MindsDB features, tutorials, and community engagement.
- Produced YouTube tutorial videos demonstrating how to install MindsDB using pip and Docker. Kindly see videos [Deploy MindsDB using Docker](#) and [Deploy MindsDB using PIP on Linux](#)
- Helped strengthen community engagement by creating educational and accessible technical content for developers.

Vodacom (Call Force)

2020-05 - 2021-01

FTTH(Fibre to the home)Technical Helpdesk Agent

Vodacom is one of South Africa's leading Mobile and Internet Service Infrastructure providers that supply internet connectivity and value-added services to its customers. Our Team's focus was dealing with the increased demand for high-speed at-home Internet connectivity during the Covid Lockdown period.

After completing In-Office Training, I started working remotely as a Technical Agent being promoted to team coach based on performance within two months. Both positions held helped me pioneer the way Vodacom provides customer service to its FTTH customers and develop business processes within the Call Centre.

- Helpdesk & Client Relationship Management
 - Assist customers in cancellations and ONT releases.
 - Provide customer support in Relocation queries.
 - Handling all customer queries regarding the Self-Built and FTTH installation process and Value Added Services(not in-store products) within SLA.
 - Liaise with various FTTX Departments to resolve service requests.
 - Liaise with RAM delivery Warehouse and track customer deliveries.
 - Check vetting status and escalate Vetting declined orders to the Vetting department to assist with credit-related issues.
 - Provide customer billing statements and billing account information via Vodacom's M2 Morpheus billing portal.
 - Troubleshoot and logging service requests for customer assets.
 - Provide customer support to ONT, LTE and VOIP installation and activation.
 - Confirmation of Network provider and fibre live states on Vodacom Partner Portal.
- Data Administration
 - Updating customer delivery and installation address on Siebel and MSPI database.
 - Processing service requests, creating users and escalate incorrect account information on Siebel and MSPI system.
 - Tracking the status of the installation phases on MSPI audit logs and escalate errors and system-related issues to the relevant department.
 - Verify correct Asset Information on the registry to ensure successful connections.

FTTH Team Coach

This role was simultaneously fulfilled during the period as Technical Helpdesk Agent. As a team coach, I managed 10 people whilst providing support to Operations Manager, WFS, Team leaders and management staff.

- Reporting:
 - Pending Installation Service requests logged to the Self-Built Scheduling Department.
- Documentation:
 - Warehouse fall-out errors and their solutions.
 - Template for Service Requests and Call flow tips.
 - Contact lists of relevant FTTX departments and staff members.
 - Training manuals and business processes on:
 - Login Service Requests on Siebel systems
 - Tracking status of installations on MSPI.
 - Tracking ONT activation status.
 - Scheduling Self-Built installations on Siebel.
- Coaching:
 - Coaching teams on QA performances and knowledge gaps.
 - Coaching team members on monthly NPS(Network Promotor Score) and FCR(First Call Resolution) and ensuring KPI targets are met whilst ensuring I meet my own Performance Incentives.
 - Developing solutions to improve NPS and FCR KPI targets.
 - Handle escalated irate customers and Relocation requests out of SLA.
 - Provide solutions to improving soft and hard skills.
 - Presenting team meetings and 'check-ins' to uplift team spirits and provide a platform for agents to express themselves.
 - Assist agents with technical issues.
- Ad-hoc:
 - Schedule Self-Built Installations.
 - Represent my team in Vodacom management staff meetings.
 - Liaise and build relationships between FTTH Sales, FTTH Bitstream, Self-Built Scheduling and Call Centre management team to improve overall results.

Reason for leaving:

The position was originally remote-based, however, agents and management staff were requested to return back to the office building whilst Covid figures were high. Due to covid cases being confirmed at the offices I decided to resign as my partner and I are the only primary caretakers of our children at the time. I decided then to take the time to improve on my skills in order to apply for a more suitable position.

Engen Petroleum Limited (Call Force)

2019-01 - 2019-07

Key Account Management Representative

I was assigned to Engen's Tier 1 and 2 customers' portfolios to provide Value-Added services and acted as one of the key drivers for enabling Customers to manage their business on Engen's new Online Platform. Reporting was a core metric, utilizing SQL and Excel to extract and manipulate data for reports.

KEY RESPONSIBILITIES:

Value-Added Services:

- Reporting and Analyses:
 - Online Platform Activity
 - Sales Volumes
 - Open orders affecting customer credit.
 - Delivery Reports (Depot Performance)
 - Returned Orders
 - Late & Short Deliveries
 - Trend analyses on customer behavior:
 - Ordering patterns
 - Returned orders
 - Error Rates (Root Cause Analysis)
- Client relationship management via Telephonic & Email communications:

- Provide Tier 1 and 2 customers with a customer-centric experience.
- Building and maintain strong internal and external relationships.
- Providing pro-active communications
- Liaise between relevant internal and external parties to resolve issues.
- Internal and external customer query management.
- Data Capture:
 - Sales Order and Plant Maintenance Job card placements.
 - Assist in delivery date and delivery schedule changes.
 - Document in customer portfolio all value-added services provided to customers.
- Educate customers on business processes and provide offerings like Engen Online Platform.

Reason for leaving:

My life partner received a work opportunity allowing him to work from home and to provide for our household. We agreed that I will look after our daughter full time during the first few months and would return to the full-time workforce.

This position allowed me to explore and advance my technical skills and knowledge whilst applying them to assist all E-commerce related queries for internal and external customers.

I joined the E-commerce team when Engen was in the process of converting its customers to their new online platforms to track their orders. This role gave me experience with working with Engen's integrated portals, user interfaces and data technologies, tools and databases. It provided the opportunity to be part of the Mobile Application and Online Ordering website testing phase all through to the production phase and assist in enhancing customer experience thereafter.

KEY RESPONSIBILITIES:

- Customer Service Help Desk
 - End-to-End Query Management for internal, external partners and customers.
 - Troubleshooting mobile application, network, browser, device & account issues.
 - Answering inquiries with regards to Engen's Online Platform.
 - Liaising with required parties (internally & externally) to minimize escalations to 2nd Line Support.
 - Promotion of Online Self-service & Automated Ordering solutions.
 - Check Mailchimp for whitelisted email addresses and escalate.
 - Resolve customer feedback on the mobile application.
 - Liaise with 3rd party vendors like Nebula to resolve customer queries, mobile and desktop application issues.
 - Capturing of fuel dips.
- Online Ordering Platforms:
 - Order testing in SAP QAS environment
 - Assist in Mobile Application and Online Ordering platform testing.
 - Customer and Organization Onboarding.
 - User Account creation and access management.
 - Product Material code and Account number mapping.
 - Read files in JSON and XML format.
 - Educate customers in placing and tracking online orders.
 - Read API audit logs.
 - Troubleshoot errors on online orders.
 - Liaising with SAP Solutions Architect to resolve customer account and technical issues.
- Master Data Administration
 - Generate and maintain customer user profiles on Engen Identity Service.
 - User account management on M2North Ordering Portal.
 - SAP Master Data maintenance.
- Reporting & Analysis
 - Ensuring orders and invoices are received on the M2north portal and sent through to Engen's database.
 - Engen Product code mapping on M2north portal, ensuring customer's code is correctly mapped to Engen's product code on the portal.
 - Documents customer trouble reports in SAP CRM and escalates according to established standard operating procedures.
 - Identify outstanding customer dip reports and follow up with customers.
 - Compiles customer dip information and submits to Scheduling.
- Ad-hoc
 - Technical writing to explain and translate technical terms into user-friendly language.

Reason for leaving:

Due to staff resource constraints, a unique opportunity arose in Engen's Key Accounts Management Department where I would have similar responsibilities but for a specific set of Tier 1 & 2 customers, with the company's main focus point being the Self-Service & Automation of Sales Documents of their biggest customers, hence taking on the role whilst only being in this new department for a short period.

COMPANY: Engen Petroleum Limited

RESPONSIBILITIES:

- Order placements on SAP CRM.
- Logging plant maintenance job cards on customer's asset registry.
- Checking delivery schedule for scheduled orders on SAP ERP.
- Logging customer queries on SAP CRM.
- Confirming stock availability on SAP ERP.
- After-hours Maintenance support.
- Dealing with Retail, B2B, KAM and End-user customers.
- Creating and updating customer contact details on SAP CRM.
- I briefly had the opportunity in assisting with BHD pro-actives.

ADHOC:

- Following up with Vendors & Depot's when escalation is required, this is not required of myself but there have been numerous situations where the relationship with the customer could have been damaged.
- Always try to ensure that everyone receives the same communication, as processes change at a rapid pace whilst managing customer expectations.

Waverley Hills, De Kelder

2013-08 - 2014-01

Wine-Tasting Assistant

Waverley Hills is a wine farm that specializes in organic wine and olives. I managed the wine tasting room on Saturdays and Sundays.

RESPONSIBILITIES:

- Promoting and giving detailed information to customers about wine and other products.
- Taking orders and serving customers.
- Interacting with local and international customers.
- Operating Point of Sales. (e.g. Cash sales. Card machine operation etc.)
- Cashing up and working under own supervision.
- Cleaning shop premises.
- I received numerous compliments from both customers, management & internal staff for doing more than what is required from my role.

Education

Wolseley Sekonder

2008 - 2012

National Senior Certificate

- Afrikaans Home language
- English First Additional language
- Life orientation
- Mathematics
- Geography
- Physical Science
- Life Science

ESRI

04-2021 - 05-2021

ESRI ArcGIS MOOC Certificates

- Certificate in Esri's Do-It-Yourself Geo App MOOC
- Certificate in Esri's Cartography MOOC.
- Certificate in Esri's The Location Advantage-Spatial Analytics
- Certificate in Esri's Spatial Data Science: The New Frontier

Udemy:

- Technical writing JSON and XML API's
- SQL Database administration

Professional Achievements & Projects

MindsDB:

- Successfully managed and supported online developer communities across Slack, GitHub, and social platforms for MindsDB.
- Led and improved community hackathon initiatives, including redesigning and scaling the company's Hacktoberfest programs.
- Transformed GitHub release notes into engaging marketing content, later rebranding the initiative into the "Monthly Product Update" blog series.
- Rebranded and expanded the company's monthly community calls into the "MindsDB In Practice – Live Demo & Q&A Webinar" series.
- Secured listings and visibility for MindsDB across partner websites, integration documentation, and third-party GitHub repositories which increased brand awareness.
- Independently managed the open-source contributor rewards program and company SWAG store, including contributor engagement and reward coordination.
- Led initiatives focused on maintaining consistent brand messaging and reputation management across third-party review and listing platforms.
- Created product landing pages, promotional assets, and video content for the MindsDB website.
- Led the initiative to harvest the Open Source Community for potential customers and high quality developers that can contribute to our product and do part time paid work

Engen:

- Investigated and resolved multiple incorrect mappings on the M2north ordering portal and designed a template that displays the unit of measurements customers order in and provided the calculation for the conversion rate that should be applied when placing orders. This minimized incorrect order placements and returns.
- Creating a training manual on how to use Engen's IT department ticketing system called SNOW. When I started none of the agents was using the ticket logging system to track customer tickets logged as it was unknown to them, I documented the process in using and managing it for my team and I to use.
- Part of Engen petroleum's project to convert their customers to their online platform entailed capturing account master data for all customers on the new platform; assisting customers with registration; create online profiles for all customers; assisting any navigational issues or any online related query.
- Part of Engen's mobile application launch by assisting in the testing and deployment phases of the application and dealing with all customer related queries when it came to the mobile app. This entailed liaising between the business, IT department, vendors and the customer for solutions to issues.

Vodacom:

As a team coach, I created and documented the official escalation process on troubleshooting and escalating Installations related queries. When the company and team required more understanding, I documented a manual that gives a guideline on how to use Vodacom's installation scheduling system in my absence.

Own initiatives:

- Document relevant contact lists of relevant FTTX departments and staff members.
- Documenting training material and business processes on:
 - Logging Service Requests on Siebel systems
 - Tracking status of installations on MSPI.
 - Tracking ONT activation status.
- Document template for information required to log a Service Request.
